# BRITISH CHEMICAL ENGINEERING

## INDEX TO VOLUME 9: JANUARY—DECEMBER, 1964

**SUBJECT**

### A

**Absorption.** Brush up your * theory, by F. A. Holland ... ... 294
Trays for $CO_2$ * ... ... ... D.430
Wetting agents affect * rates ... D.660
Fluidized absorber ... ... D.660
Absorber flooding problem solved P.857
**Acetic acid** from naphtha... ... D.812
**Acetylene** and ethylene by plasma D.209
**Adsorption** rate studies ... ... D.71
A guide to adsorber design ... D.146
Advances in * processes, by J. W. Carter ... ... ... ... 232
**Agglomeration** process has possibilities ... ... ... ... D.214
**Air** diffusion plant costs ... ... D.6
**Alarms** and alarm instruments in the chemical plant, by Leo Walter ... 166
**Ammonia.** Removing * from waste water ... ... ... ... D.4
Developments in * synthesis ... D.139
Steam recovery in * synthesis ... D.139
Trends in * reactor design ... D.139
* complex reflects latest trends ... D.140
Synthetic * project in Norway ... D.163
Problems in the design of * synthesis reactors, by W. Hennel ... 290
**Atomizing** and spray drying of paste-like materials, by J. Turba and J. Nemeth ... ... ... 457
**Automation.** Preparing the chemical industry for more * ... C.770

### C

**Carbon dioxide.** Instant * plant complete with building ... ... F.687
**Carbon disulphide.** Tradition restored in * manufacture ... ... D.210
**Cast iron** replaces lead in vitriol coolers ... ... ... ... P.248
Polyethylene protects * ... ... P.473
**Catalysis** in practice—an international discussion ... ... ... C.550
Flame-sprayed nickel catalyst is basis of new gas reactor ... ... D.662
**Chemical engineering**—electrical engineering: a developing union, by S. A. Gregory ... ... ... 749
**Chemical industry,** optimum use of capital ... ... ... ... L.219
**Chemicals.** Fine * plant designed for maximum versatility ... ... F.609
Electrochemical route for fluorinated * ... ... ... ... D.582
**Cladding.** Explosions aid * ... D.286
Clad vessel problems and a solution ... ... ... ... ... D.729
**Coal.** Arc process for * conversion D.209
Iron from * ash ... ... ... D.210
Nuclear heat for * gasification ... D.358
**Columns.** Horizontal * for mass transfer ... ... ... ... D.2
**Combustion** chemistry of hydrocarbons, by K. Littlewood ... 82
**Comecon:** More or less trade for the West? ... ... ... ... F.313

**PAGE REFERENCE**

| | | |
|---|---|---|
| January ... | ... pages | 1- 70 |
| February ... | ... ,, | 71-138 |
| March ... | ... ,, | 139-208 |
| April ... | ... ,, | 209-278 |
| May ... | ... ,, | 279-354 |
| June ... | ... ,, | 355-426 |
| July... | ... ,, | 427-498 |
| August ... | ... ,, | 499-578 |
| September | ... ,, | 579-656 |

| November | ... ,, | 729-808 |
| December | ... ,, | 809-880 |

**Compressors.** Developments in * D.214
Cost of * drives ... ... ... D.214
**Computer** applications in chemical process control, by P. N. Nikiforuk and E. B. Tinker ... ... ... 17
Striking savings with * control ... D.282
Look before employing * control D.282
* technique systematically reviews project schedules ... ... ... D.362
Hybrid * solves design problems... D.362
Steady advance of * control ... D.809
Direct digital control comes to stay ... ... ... ... ... D.809
* to * applications proposed ... D.609
**Condensers** for vapour-gas mixtures and foams ... ... ... D.210
The non-condensable gas problem D.502
Electrostatics and condensation ... D.580
Air-cooled * possibilities ... D.736
Graphical design for cooler * for gas-vapour mixtures, by Shozo Sadamoto ... ... ... 740
**Conferences**
XIV Congress 'Chemistry Days 1963', Milan, June 1963 ... ... 41
6th World Petroleum Congress, Frankfurt on Main, June, 1963 ... 112
The Handling and Storage of Process Materials, London, October, 1963 ... 178
Chemical Engineering in the Metallurgical Industries, Edinburgh, September 1963 ... ... ... ... 244
1st International Filtration Symposium, London, February 1964 ... 247
Treatment of Liquid Effluents, Manchester, January 1964 ... ... 318
Symposium on Dynamics and Control of Multistage and Distributed Parameter Systems, Stanford Research Institute, California, September 1963 ... ... ... 320
International Symposium on High Temperature Technology, Houston, December 1963 ... ... ... 322
Automation at Brno CHISA Conference, September 1962 ... 396 and 468
Catalysis in Practice, Harrogate, June 1963 ... ... ... ... 550
Symposium on Process Optimization, Loughborough, February 1964 ... 632
Cryogenic Engineering Conference, Philadelphia, August 1964 ... ... 694
**Conferences (contd.)**
Conference on Automatic Control in the Chemical Processing Industries, Liverpool, April 1964 ... ... 770
37th Annual Meeting, American Water Pollution Control Federation, Bal Harbour, September 1964 ... 850
Joint Automatic Control Conference, California, June 1964 ... 854
**Construction.** Survey of European Chemical Plant *. Part 1 ... ... 172
Part 2 ... ... 240
**Contacting.** The latest in * devices D.142
Turbine contactors tackled ... D.355
New vapour-liquid contactor ... D.432
A new multi-purpose contactor ... D.579
**Control.** Computer applications in chemical process *, by P. N. Nikiforuk and E. B. Tinker ... ... 17
The economics of process * in the U.S.S.R., by L. A. Steiner ... 110
Modern trends in remote supervisory * ... ... ... ... F.171
Savings with computer * ... D.282
Look before employing computer * D.282
Process dynamics and * discussed in Houston ... ... ... ... C.320
Brno conference on process * ... C.396
Trends in automatic process * discussed at Brno ... ... ... C.468
Process * trends at I.E.A. ... E.532
Trends in * panel design ... F.681
Density * at ore dressing plant ... P.778
Steady advance in computer * ... D.809
Direct digital * comes to stay ... D.809
Computer-to-computer applications proposed ... ... ... D.809
* of single exothermic reactions ... D.814
Instrumentation and * of effluent treatment ... ... ... ... D.816
New industrial applications of automatic * ... ... ... ... C.854
**Convective** transport problems ... D.358
**Conveyor.** Small pneumatic-type solids * ... ... ... ... P.119
Flat wire belt aids product reclamation ... ... ... ... P.556
* line combines spiral and flat wire belting ... ... ... ... P.778
**Convolution integral.** Numerical evaluation of a *, by S. C. Jain and Ishwar Chandra ... ... ... 827
**Corrosion.** Design to prevent * ... P.401
**Cost estimating.** Estimating the cost of project design, by H. Stogens 239
Scale-up of chemical engineering cost estimations, by F. A. Holland and R. Brinkerhoff ... ... ... 384
**Cracking.** Pilot-plant eliminated in * furnace design ... ... ... D.730
**Crushing.** Electrohydraulic * ... D.499
New type of (roll) crusher ... D.499
**Cryogenics.** Calculating pressurized transfer of liquefied gases ... ... D.506
Advances in materials for * applications ... ... ... ... D.664
Practical advances in * engineering C.694
New titanium alloys for * service D.730
**Crystallization.** Recent advances in *, by J. W. Mullin ... ... 438

## D

**Design** of distillation columns with side-streams, by W. H. Granville ... 89
Trends in (ammonia) reactor * ... D.139
Aids to heat transfer * ... ... D.142
A guide to jet pump *, by S. T. Bonnington ... ... ... ... 150
Help for the drier designer ... D.284
Problems in the * of ammonia synthesis reactors, by W. Hennel ... 290
New principle in sizer * ... ... D.356
Hybrid computer solves * problems ... ... ... ... ... D.362
Guidance on extractor * ... D.430
Optimization of heat exchanger * by J. W. Fisher ... ... ... 450
Problems of information communication ... ... ... ... C.470
Practical tips for leaching plant *... P.472
Data for * ... ... ... ... D.500
Interest in equilibria and enthalpy D.500
New research results in heat exchanger * ... ... ... ... D.502
Calculating pressurized transfer of liquefied gases ... ... ... D.506
For the heat exchanger designer... D.657
Estimating strength of thick-walled cylindrical pressure vessels D.664
* of distillation columns with multiple feeds, by H. E. Eduljee ... 668
Graphical * of cooler-condensers for gas-vapour mixtures, by S. Sadamoto ... ... ... ... 740
* of bubble-cap distillation plates, Part I, hydraulic behaviour, by H. E. Eduljee ... ... ... ... 820
**Diffusion thermo** — neglected phenomenon? ... ... ... D.76
**Difluoroborane.** First synthesis of * D.582
**Dimensional analysis.** Pitfalls in * and log-log plotting ... ... D.284
**Distillation.** Design of * columns with side streams, by W. H. Granville ... ... ... ... 89
Search for greater * output underlines design lesson ... ... ... D.430
Steam or dry * ... ... ... D.434
Simulating multicomponent * ... D.434
*. A refresher:
Part 1, by F. A. Holland ... 444
Part 2, ,, ,, ... 517
Part 3, ,, ,, ... 597
Design of * columns with multiple feeds, by H. E. Eduljee ... ... 668
Fastening tunnel caps to rectifying column plates ... ... ... P.779
**Drier.** Sampling device for pneumatic * ... ... ... ... P.46
Help for the * designer ... ... D.284
Simulation of * proves its worth... D.732
Fluidized-bed */cooler for polymer chips, by N. Cherrett ... ... 843

## E

**Efficiency.** Some aspects of process *, by H. Jackson ... ... ... 106
**Effluents.** Cost of treating carbonizing * unpredictable ... ... D.2
Treatment of combined municipal and industrial wastes ... ... D.71
Deepwell disposal has possibilities D.72
Novel scrubber for pollution control ... ... ... ... D.74
Separation techniques in * processing ... ... ... ... C.318
Ion removal and its application to radioactive * treatment, by D. Pepper ... ... ... ... 510
Approaches to * treatment ... D.730
Compact biological treatment unit D.732
Instrumentation and control of * treatment ... ... ... ... D.816
Wide range of * and water pollution problems revealed ... ... C.850
**Ejector.** Tracing faults in steam jet * sets ... ... ... ... P.249
**Elastomer.** Laboratories for * research ... ... ... ... F.388
**Ethers.** Thermodynamic properties of organic compounds. Part I. Normal symmetrical aliphatic *, by S. C. Banerjee and L. K. Doraiswamy 311
**Ethylene.** Vinyl acetate from * —a new trend ... ... ... ... D.209
Acetylene and * by plasma ... D.209
Compressibilities of * at low pressures, by A. M. P. Tans ... N.250
**Evaporation.** Water extraction by hydrocarbon flash * ... ... ... D.72
New multi-stage flash evaporator for process liquors, by C. Rhodes ... 93
Calculation of steam economy by condensate recovery in multiple effect *, by Chen-Sian Huang ... 690
**Exhibitions.** Processing equipment at Brno ... ... ... ... 37
The 29th Chem Show ... ... 389
Processing hardware at Leipzig ... 449
Chemical plant at Leipzig ... ... 464
Process control trends at I.E.A. ... 532
Achema 1964. Part 1 ... ... 543
Part 2 ... ... 619
Part 3 ... ... 692
Part 4 ... ... 762
Chemical plant exhibits at Brno ... 846
**Extraction.** Mass transfer in liquid-liquid * ... ... ... ... D.144
* calculations simplified ... ... D.144
Calculations of * columns with longitudinal mixing, by V. Rod ... 300
Uniform drop models in * mislead D.355
New extractor free from limitations of existing equipment ... D.356
Guidance for extractor design ... D.430
The Graesser extractor ... ... D.584

## F

**Feeder.** Automatic lime-slurry * ... P.324
**Fertilizer.** Simple tar-based * ... D.280
Economies in * manufacture ... D.360
Granulation advances applied to * manufacture ... ... ... D.428
* from sea-water ... ... ... D.660
**Fibre-reinforced metals** for the future ... ... ... ... ... D.279
**Filter.** Line * with easily removable elements ... ... ... ... P.182
* uses capillary action of plastic foam belt ... ... ... ... D.212
**Filtration.** A * dilemma resolved ... D.212
A new effect in * ... ... D.214
Some industrial * developments reviewed ... ... ... ... C.247
Dual-purpose filtrate pump ... P.556
Graphical analysis of * process, by N. J. Hassett ... ... ... 753
**Flotation.** Progress in agitatorless * D.810
**Flue gas.** Chart for * properties ... D.210
**Fluid dynamics.** Dispersion in flow through pipes and packed beds, by J. C. R. Turner ... ... ... 376
Pressure drop in fluidized beds ... D.584
Pressure drop in two-phase systems ... ... ... ... D.584
Critical two-phase flow predicted D.584
Pressure drop and heat transfer in gas-liquid slug flow in horizontal tubes, by D. R. Oliver and S. J. Wright ... ... ... ... 590
Pressure drop and heat transfer in annuli ... ... ... ... D.662
Calculating liquid flow when back pressure changes ... ... ... P.779
**Fluidization.** Studies on gaseous * of solids: Part 2. Correlating head loss during flow through fixed and fluidized solids beds by means of dimensionless groups, by G. N. Bhat, K. Guconic-Murthy and E. Weingaertner ... ... ... 160
Part 3. Incipient bubbling in fluid beds, by G. N. Bhat and E. Weingaertner ... ... ... ... 316

**Fluidization (contd.)**
Terminal velocity of spheres in fluidized beds, by J. Prudhoe and R. L. Whitmore ... ... ... 371
* finds numerous uses ... ... D.427
Recent Soviet research on *, Part 1 ... ... ... ... ... 461
Part 2 ... ... ... ... ... 541
Pressure drop in fluidized beds ... D.584
Fluidized absorber ... ... D.660
**Foam** (fractionator) tackles detergent problem... ... ... ... D.6
* for mass transfer ... ... D.355
* exchanger for cooling synthesis gas ... ... ... ... ... D.428
* control by acoustic and aerodynamic means, by B. Maczewski-Rowinski ... ... ... ... 704

## G

**Gas.** Nuclear heat for coal gasification ... ... ... ... ... D.358
* making: An industry with a future ... ... ... ... ... L.365
Progress in the production of * from light petroleum products, by G. S. Cribb ... ... ... ... 366
Economies from * recovery ... D.736
Flexible new process simplifies production of * from oil ... ... D.810
A simple * detection system ... P.325
**Glass.** Improved * for constructional use ... ... ... ... ... D.664
New plant for *-lining of tanks ... F.826
**Glitsch grid**—the latest in contacting devices ... ... ... D.142
**Glucose.** Catalytic reduction of D-* to D-sorbitol in aqueous medium, by P. H. Brahme, M.U. Pai and G. Narsimhan ... ... ... ... 684
**Granulation** advances applied to fertilizer manufacture ... ... D.428
Scottish advances spotlight new * technique ... ... ... ... D.428
**Graphite.** Repairs to impregnated * plant ... ... ... ... P.557

## H

**Handling** and storage of process materials ... ... ... ... C.178
**Heat exchangers.** Experiments open up new approach to laminar flow of gases in * ... ... ... D.140
Foam * for cooling synthesis gas ... D.428
News of Warren Spring froth exchanger ... ... ... D.428
Optimization of a * design, by J. W. Fisher ... ... ... ... 450
New research results in * design... D.502
For the * designer ... ... D.657
Focus on air-cooled * ... ... D.734
Internally finned tubes and chemical plant exchanger economy D.734
Economics of air cooled * ... D.734
Protecting * header boxes ... P.857
**Heat transfer.** Aids to * ... D.6
Some developments in *, by T. R. Bott ... ... ... ... ... 32
*: Many aids to design ... ... D.142
Effects of blade design in scraped surface *, by T. R. Bott and M. R. Sheikh ... ... ... ... 229
Nucleate boiling aided by surface treatment ... ... ... ... D.582
Pressure drop and * in gas-liquid slug flow in horizontal tubes, by D. R. Oliver and S. J. Wright ... 590
Calculating radiation * ... ... D.658
Pressure drop and * in annuli ... D.662
* with liquid metals ... ... F.757
Nucleate boiling and dropwise condensation ... ... ... ... D.814
**Hoppers.** Aluminium * for storage of polyethylene pellets ... ... F.310

**Humidity.** Determination of moisture content of powders ... ... P.324
Nomogram for relative *, by D. S. Davis ... ... ... ... ... N.402
Humidification and dehumidification, by F. A. Holland ... ... 678
**Hydrocyclones** in waste water treatment ... ... ... ... D.4

I

**Ion exchange.** Ion removal and its application to radioactive effluent treatment, by D. Pepper ... ... 510
Mass transfer in * predicted ... D.586
**Iron** from coal ash ... ... ... D.210

K

**Kiln.** Cooling * products ... ... D.8
Improvements in vertical shaft * D.362

L

**Logarithmic** scales from the typewriter ... ... ... ... P.473

M

**Magnetoplasmadynamic** generation of electricity, new advance ... D.280
**Mass transfer.** Which theory for *? D.1
Horizontal columns for * ... D.2
Brush up your * theory, by F. A. Holland ... ... ... ... 96
Bubbles, surface roughness, suspended solids... ... ... ... D.284
Non-additivity of individual film resistances in interphase * processes F.293
Foams for * ... ... ... D.355
The two-film theory under fire ... D.356
Worthwhile guidance on drops and bubbles ... ... ... ... D.427
**Melting.** New * techniques widen horizon for special metals and alloys F.23
**Metallurgy.** Metallurgical industry—a fertile field for chemical engineering ... ... ... ... C.244
Fibre reinforced metals for the future ... ... ... ... ... D.279
A convincing test for a 9% nickel alloy ... ... ... ... D.500
Metal-reinforced metals ... ... D.580
Novel welding techniques for aluminium effluent pipe ... ... D.580
**Metering.** Individual calibration ensures high accuracy of flow meters F.92
Back pressure regulating device in hydrogen distribution ... ... P.182
New method of * gases ... ... P.248
Calibration of gas flow meters ... P.473
**Metric-British** conversion chart ... N.46
**Mixers.** New York bring to light new * ... ... ... ... ... D.2
Fresh light on heat transfer in * ... D.140
Versatile * points new trend in reactor design ... ... ... D.504
Extra large * for vinyl compounds plant ... ... ... ... ... F.761
**Mollier.** A tribute to * ... ... L.149

N

**Natural gas.** Offshore * for U.K.? D.216
**Nitric acid.** Bibliography of * manufacture. Part 3, by K. Bourton 60
Part 4, ,, 266
Plant changes increase * concentration ... ... ... ... D.279
Optimum pressure for * plants ... D.814
**Nitrous oxide.** Compressibility factors for *, by D. S. Davis ... ... N.325
**Non-linear phenomena.** A new approach to * ... ... ... D.360
**Nozzle.** An extrusion * with variable diameter ... ... ... P.118
**Nuclear heat** for coal gasification D.358

O

**Optimization** of a heat exchanger design, by J. W. Fisher ... ... 450
Symposium reveals variety of approaches to process * ... ... C.632
* procedure for a complex plant, by J. F. Brander, E. J. Cannon and B. D. Dagnall ... ... ... 745
Optimizing sulphur recovery from $H_2S$ ... ... ... ... D.812
Optimum conditions for oxygen recovery ... ... ... ... D.814
Optimum pressure for $HNO_3$ plants ... ... ... ... D.814
An * application for linear programming, by A. R. Van Cauwenberghe ... ... ... ... 833
**Oxygen.** Optimum conditions for * recovery ... ... ... ... D.814

P

**Packed beds.** Dispersion in flow through pipes and *, by J. C. R. Turner ... ... ... ... 376
**Paper making.** Accent on control at * research centre ... ... D.658
**Perfumery.** Modern techniques applied to ancient art at * factory ... F.618
**Perkin triangle.** One tap * ... P.698
**Pervaporation.** Separation of organic liquids by selective permeation through polymeric films, by J. W. Carter and B. Jagannadhaswamy ... 523
**Petroleum.** Recent developments in * processing technology ... ... C.112
**Phosphoric acid.** The Nissan * process, by C. J. Pratt ... ... 535
**Physical properties.** Solubility of water in liquid hydrocarbons, by D. S. Davis ... ... ... ... N.639
The properties of mixtures, Part 1, by G. Aüslander ... ... 610
Part 2, ,, ,, ... ... 840
**Pipes.** Safe support for glass pipework ... ... ... ... ... P.639
Improved copper wire gasket for hot gas pipeline ... ... ... P.698
**Polymerization.** Continuous model for * ... ... ... ... ... D.72
**Potassium permanganate.** New British plant boosts * output ... F.382
**Pressure vessels.** Estimating strength of thick-walled cylindrical * D.664
Comparison needed for steel standards ... ... ... ... D.729
**Productivity** in experimentation... L.11
**Programmed instruction**—short cut to teaching? ... ... ... D.506
**Pumping.** Heat supplies power for * D.4
* solids into liquids against pressure ... ... ... ... ... D.78
A guide to jet pump design, by S. T. Bonnington ... ... ... 150
'See-Saw' provides two-way gravity fluid flow ... ... ... P.473
Improved sorption pump ... P.658
Automatic control of pumps for slurry transfer ... ... ... P.658
An application of air operated diaphragm pumps ... ... ... F.682
**Pyrolysis.** Modern * processes, by N. C. Debie and V. Schorr ... 24
Bibliography of * processes ... 196

R

**Rate constants.** Estimation of * of first-order reactions from continuous stirred reactor data, by B. S. Wright ... ... ... 102
**Rate constants (contd.)**
Estimation of first order * from batch reactor data, by B. S. Wright 758
**Reactor.** Trends in ammonia * design ... ... ... ... ... D.139
Combined fixed and fluid bed * ... D.142
Guidance for designers of catalytic * ... ... ... ... ... D.144
Problems in the design of ammonia synthesis *, by W. Hennel 290
Dimensioning chemical *... ... D.360
Reaction engineering ... ... D.432
* stability by Liapunov's direct method ... ... ... ... D.432
Versatile mixer points new trends in * design ... ... ... ... D.504
* design approach eliminates pilot plants ... ... ... ... D.579
Boundary value problems ... D.586
Control of single exothermic reactions ... ... ... ... D.586
Gamma radiation absorption measurement of density and gas hold-up in a three-phase catalytic *, by R. Farley and D. J. Ray ... 830
**Research.** The impact of *... ... L.81
The main problem ... ... L.437
Recent Soviet * on fluidization. Part 1 ... ... ... ... ... 461
Part 2 ... ... ... ... ... 541
The *-teaching conflict ... ... L.509
* needs discussed by N. W. Branch chemical engineers ... ... C.690
A neglected issue ... ... ... L.739
**Reflux Ratio.** A graphical method of determining minimum * in the fractional distillation of ideal ternary mixtures, by K. L. Butcher ... 220
**Refrigeration.** An introduction to helium refrigerators and liquefiers, by D. E. Ward ... ... ... 602
**Repairs.** Surgery for damaged processing equipment ... ... D.146
Repairing an enamelled metal vessel ... ... ... ... P.856
**Residence-time** measurements in chemical plant, by J. C. R. Turner ... 12

S

**Safety** manual for chemical workers F.683
**Sampling** device for gas at atmospheric pressure ... ... ... P.400
* device for reaction mixture ... P.699
**Saturator.** Improved design of ammonium sulphate * ... ... P.400
**Screening** hardware developments abound ... ... ... ... D.76
New methods of reverse * ... D.76
Removing pitch particles from liquid pitch ... ... ... ... P.182
New principle in sizer design ... D.356
**Scrubber** for pollution control ... D.74
**Sea water:** raw material source ... D.662
Fertilizer from * ... ... ... G.662
Membrane-lined glass fibre tube is basis of * conversion process ... F.829
**Sedimentation.** Rapid computation of settling or rising velocity of spherical particles in fluid media, by A. Mitzmager, A. Sadan and M. Shelef ... ... ... ... 314
**Size analysis** of sub-sieve powders using a centrifugal photosedimentometer, by M. J. Groves, B. H. Kaye and B. Scarlett ... ... ... 742
**Slurries.** Fresh light on solids-liquid conveying ... ... ... D.8
**Solvents.** Batch still is key unit at * refinery ... ... ... ... F.522
**Spray-drying.** Atomizing and * of paste-like materials, by J. Turba and J. Nemeth ... ... ... 457
**Statistics.** An introduction to simple statistical experimental designs, by J. S. M. Bottrill ... 155

**Statistics (contd.)**
Combined efforts are best ... L.289
Applications of non-parametric *.*
Part 1, by D. A. Ratkowsky ... 305
Part 2, ,, ,, ... 527
**Steam trap.** Effect of condensate temperature on * capacity, by C. E. Mapstone ... ... ... ... N.857
**Storage.** Handling and * of process materials ... ... ... ... C.178
Drainage of * tank sumps ... P.472
**Substitutes** for spark-proof tools and monel plates ... ... ... P.698
**Sulphur.** Optimizing * recovery from $H_2S$ ... ... ... ... D.810
**Sulphuric acid.** Reconstruction of a * plant ... ... ... ... P.557

T

**Tall oil.** Overcoming odour in * plant ... ... ... ... ... P.856
**Temperature.** Novel techniques for high-accuracy * measurement ... F.36
Optimal * profiles ... ... D.214
International symposium on high-* technology ... ... ... ... C.322
**Thermal conductivities** corrected for temperature ... ... ... N.119
**Thermodynamics.** Irreversible *—a short review, by Colin Storey ... 164
* properties of organic compounds. Part 1. Normal symmetrical aliphatic ethers, by S. C. Banerjee and L. K. Doraiswamy ... ... ... 311
Part 2. Normal alkylbenzene sulphonic acids, by S. C. Banerjee, D. C. Bigg and L. K. Doraiswamy ... 688
Interest in equilibria and enthalpy ... D.500
Individual efforts to supply essential data ... ... ... ... D.500
The properties of mixtures. Part 1, by G. Aüslander ... ... 610
Part 2, ,, ,, ... ... 840
**Transport.** Trends in sea * of liquefied chemicals ... ... ... F.238
**Tray.** The Thormann * ... ... D.74
Sealing distillation column *s ... P.249
* for $CO_2$ absorption ... ... D.430
Design of bubble-cap distillation plates. Part 1. Hydraulic behaviour, by H. E. Eduljee ... ... ... 820

U

**Urea** processing develops ... ... D.140

V

**Vapour pressures.** Approximate temperature scale for *, by D. S. Davis ... ... ... ... ... N.556
Approximate temperature scale for Cox * plotting paper, by D. S. Davis ... ... ... ... ... N.699
Calculation of *, by D. S. Davis ... N.860
**Vinyl acetate** from ethylene—a new trend ... ... ... ... D.209
**Vinyl chloride.** Japanese * monomer process ... ... ... ... D.502
**Viscosities** of normal liquid hydrocarbons, by D. S. Davis ... ... N.47
* of $H_2SO_4$ solutions, by D. S. Davis ... ... ... ... ... N.182
**Vitriol coolers.** Cast iron replaces lead in * ... ... ... ... P.248

W

**Waste water** renovation a challenge to chemical engineers ... D.1
Problems in removing ammonia from * ... ... ... ... D.4
Hydrocyclones in * treatment ... D.4
* extraction by hydrocarbon flash evaporation ... ... ... D.72
**Weighing.** Direct reading of weight fractions as percentage ... ... P.118
**Welding.** Diffusion * has promise ... D.657
Explosion * possibilities ... D.657
**Writing,** scientific and technical, standards of ... ... ... ... L.589

## INDEX OF AUTHORS

Ausländer, G. The properties of mixtures. Part 1 ... ... ... 610
Part 2 ... ... ... 840
Banerjee, S. C., and L. K. Doraiswamy. Thermodynamic properties of organic compounds. Part 1. Normal symmetrical aliphatic ethers 311
Bhat, G. N., K. Guconic-Murthy and E. Weingaertner. Studies on the gaseous fluidization of solids: Part 2. Correlating head loss during flow through fixed and fluidized solids beds by means of dimensionless groups. Part 3. Incipient bubbling in fluid beds ... ... ... ... 160
Part 2. Normal alkylbenzene sulphonic acids (and D. C. Biggs) ... 316
Biggs, D. C., see Banerjee, S. C. ... 688
Bonnington, S. T. A guide to jet pump design ... ... ... 150
Bott, T. R. Some developments in heat transfer ... ... ... ... 150
Bott, T. R., and M. R. Sheikh. Effects on blade design in scraped surface heat transfer ... ... 32
Botterill, J. S. M. An introduction to simple statistical experimental designs ... ... ... ... 220
Bourton, Mrs. K. Bibliography of nitric acid manufacture. Part 3 ... 155
Part 4 ... 60
Brahme, P. H., M. U. Pai and G. Narsimhan. Catalytic reduction of D-glucose to D-sorbitol in aqueous medium ... ... ... ... 266
Brander, J. F. R., E. J. Cannon and B. D. Dagnall. Optimization procedure for a complex plant ... ... 684
Bransom, S. H., and A. G. C. Palmer. An experimental 'Oslo' crystallizer ... ... ... ... 745
Brinkerhoff, R., see Holland, F. A.
Butcher, K. L. A graphical method of determining minimum reflux ratios in the fractional distillation of ideal ternary mixtures ... ... 82
Cannon, E. J., see Brander, J. F. R.
Carter, J. W. Advances in adsorption processes ... ... ... ... 672
Carter, J. W., and B. Jagannadhaswamy. Separation of organic liquids by selective permeation through polymeric films ... ... ... 314
Chandra, Ishawar, see Jain, S. C.
Cherrett, N. Fluidized bed drier/cooler for polymer chip ... ... 220
Cribb, G. S. Progress in the production of gas from light petroleum products ... ... ... ... 366
Dagnall, B. D., see Brander, J. F. R.
Davis, D. S. Viscosities of normal liquid hydrocarbons ... ... N.47
Thermal conductivities corrected for temperature ... ... ... N.119
Viscosities of $H_2SO_4$ solutions ... N.183
Compressibility factors for nitrous oxide ... ... ... N.325
Nomogram for relative humidity N.402
Approximate temperature scale for vapour pressures ... ... N.556
Solubility of water in liquid hydrocarbons ... ... ... ... N.639
Approximate temperature scale for Cox vapour pressure plotting paper ... ... ... ... ... N.699
Calculation of vapour pressure ... N.860
Debie, N. C., and V. Schorr. Modern pyrolysis processes ... ... ... 24
Doraiswamy, L. K., see Banerjee, S. C.
Eduljee, H. E. Design of distillation columns with multiple feeds ... 668
Design of bubble-cap distillation plates. Part 1. Hydraulic behaviour... 820
Farley, R., and D. J. Ray. Gamma radiation absorption measurement of density and gas hold-up in a three-phase catalytic reactor ... 830
Fisher, J. W. Optimization of a heat exchanger design ... ... ... 450
Granville, W. H. Design of distillation column with side streams ... 89
Gregory, S. A. A developing union 749
Groves, M. J., B. H. Kaye and B. Scarlett. Size analysis of sub-sieve powders using a centrifugal photosedimentometer ... ... ... 742
Guconic-Murthy, K., see Bhat, G. N.
Hassett, N. J. Graphical analysis of filtration process ... ... ... 753
Hennel, W. Problems in the design of ammonia synthesis reactors ... 290
Holland, F. A. Brush up your mass transfer theory ... ... ... 96
Brush up your absorption theory 294
Distillation: A refresher: Part 1 ... 444
Part 2 ... 517
Part 3 ... 597
Humidification and dehumidification ... ... ... ... ... 678
Holland, F. A., and R. Brinkerhoff. Scale-up of chemical engineering cost estimations ... ... ... 384
Huang, Chen-Sian. Calculation of steam economy by condensate recovery in multiple-effect evaporation 690
Jackson, H. Some aspects of process efficiency ... ... ... ... 106
Jagannadhaswamy, B., see Carter, J. W.
Jain, S. C., and Ishawar Chandra. Numerical evaluation of a convolution integral ... ... ... ... 827
Kaye, B. H., see Groves, M. J.
Littlewood, K. Combustion chemistry of hydrocarbons ... 82
Mitzmager, A., A. Sadan, and M. Shelef. Rapid computation of settling or rising velocity of spherical particles in fluid media ... ... ... 314
Mullin, J. W. Recent advances in crystallization ... ... ... 438
Narsimhan, G., see Brahme, P. H.
Nemeth, J., see Turba, J.
Nikiforuk, P. N., and E. B. Tinker. Computer applications in process control ... ... ... ... 17
Oliver, D. R., and S. J. Wright. Pressure drop and heat transfer in gas-liquid slug flow in horizontal tubes ... ... ... ... ... 590
Pai, M. U., see Brahme, P. H.
Palmer, A. G. C., see Bransom, S. H.

Pepper, D. Ion removal and its application to radioactive effluent treatment ... ... ... ... 510
Pratt, C. J. The Nissan phosphoric acid process ... ... ... ... 535
Prudhoe, J., and R. L. Whitmore. Terminal velocity of spheres in fluidized beds ... ... ... 371
Ratkowsky, D. A. Applications of non-parametric statistics. Part 1 ... 305
Part 2 ... 527
Ray, D. J., see Farley, R.
Rhodes, C. New multistage flash evaporator for process liquors ... 93
Rod, V. Calculation of extraction columns with longitudinal mixing ... 300
Sadamoto, Shozo. Graphical design of cooler-condensers for gas-vapour mixtures ... ... ... ... 740
Sadan, A., see Mitzmager, A.
Scarlett, B., see Groves, M. J.
Schorr, V., see Debie, N. C.
Sheikh, M. R., see Bott, T. R.
Shelef, M., see Mitzmager, A.
Steiner, L. A. Some notes on the economics of process control in the U.S.S.R. ... ... ... ... 110
Stogens, H. Estimating the cost of project design ... ... ... 239
Tans, A. M. P. Compressibilities of ethylene at low pressures ... ... N.250
Tinker, E. B., see Nikiforuk, P. N.
Turba, J., and J. Nemeth. Atomizing and spray-drying of paste-like materials ... ... ... ... 457
Turner, J. C. R. Residence-time measurements in chemical plant ... 12
Dispersion in flow through pipes and packed beds ... ... ... 376
Van Cauwenberghe, A. R. An optimization application of linear programming ... ... ... 833
Walter, Leo. Alarms and alarm instruments in the chemical plant ... 166
Ward, D. E. An introduction to helium refrigerators and liquefiers... 602
Weingaertner, E., see Bhat, G. N.
Whitmore, R. L., see Prudhoe, J.
Wright, B. S. Estimation of rate constants of first order reactions from continuous stirred reactor data ... ... ... ... ... 102
Estimation of first order rate constants from batch reactor data ... 758
Wright, S. J., see Oliver, D. R.

## BOOK REVIEWS

Administration of the Chemical Enterprise, Ed. C. Berenson ... 406
Advances in Petroleum Chemistry and Refining, Vols. V, VI and VII, Ed. J. J. McKetta ... ... ... 702
Cellulose Plastics, Cellulose Acetate, Cellulose Ethers, Regenerated Cellulose, Cellulose Nitrate, by V. E. Yarsley, W. Flavell, P. S. Adamson and N. C. Perkins ... ... ... 558
Chemical Aspects of Nuclear Reactors, by J. K. Dawson and R. G. Sowden ... ... ... ... 330
Chemical Engineering, Vol. 1 (2nd Ed.), by J. M. Coulson and J. F. Richardson ... ... ... ... 782
Chemical Engineering Practice, Vol. 7—Heat Transfer, Ed. H. W. Cremer and S. B. Watkins ... ... 858
Chemical Engineers' Handbook (4th Ed.), Ed. R. H. Perry, C. H. Chilton and S. D. Kirkpatrick ... ... 474
Chemical Equlibria and Reaction Rates at High Pressure by M. G. Gonikberg. Trans. by M. Artman ... 406
Chemical Industry, The: Viewpoints and Perspective, Ed. C. Berenson ... 558
Chemical Reaction Engineering: An Introduction to the Design of Chemical Reactors, by O. Levenspiel 782
$CO_2$ Welding for Pipeline Construction, by J. W. Jones ... ... 252
Computation of Multistage Separation Processes, by D. N. Hanson, J. H. Duffin and G. F. Somerville. Ed. C. R. Wilke ... ... ... 330
Corrosion, Ed. L. L. Shreir ... 330
Economics of Australian Industry, The, Ed. A. Hunter ... ... 48
Eighth International Symposium on Combustion ... ... ... ... 48
Einfuhrung in die Messtechnik der Kernstrahlung und die Anwendung der Radioisotope, by H. Fassbender 558
Fluidized Particles, by J. F. Davidson and D. Harrison ... ... ... 332
Friedel-Crafts and Related Reactions, Vol. I: General Aspects, Ed. G. A. Olah ... ... ... 474
Handbook of Laboratory Distillation, by E. Krell, Ed. E. C. Lumb ... ... 332
Ion Exchange Separations in Analytical Chemistry, by O. Samuelson 858
Mass Transfer Process Calculations, by H. Sawistowski and W. Smith ... 252
Mathematical Methods in Chemical Engineering, by V. G. Jenson and G. V. Jeffreys ... ... ... 782
Mechanical Equipment for Removing Grit and Dust from Gases, by R. Jackson ... ... ... ... 558
Modern Power Station Practice, Vol. 2 ... ... ... ... 406
Molecular Sieves, by C. H. Hersh ... 48
Molecular Stills, by P. Ridgway Watt 252
L'Oxydation des Métaux, Tome I: Processus Fondamentaux, Ed. J. Bénard ... ... ... ... 558
Tome II: Monographies ... ... 558
Polyurethanes: Chemistry, Technology and Properties, by L. N. Phillips and D. B. Parker ... ... 702
Practical Handbook of High Vacuum Techniques, by H. L. Eschbach ... 252
Proceedings of Symposium on Interaction between Fluids and Particles (London, 20–22 June, 1962) ... 48
Progress in Reaction Kinetics, Vol. II, Ed. G. Porter ... ... ... 858
Russian-English Chemical Reader, by A. A. Kramer ... ... ... 702
Steam Tables, 1964 ... ... ... 782
Technischen Anwendungen der Radioactivität: Vol. I ... ... 474
